DETAILED ACTION

Response to Amendment

1. Applicant's arguments, see amendments filed 2/13/2009 with respect to 8-12 have been fully considered and are persuasive. Claims 8-12 are allowable over the prior art.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Faist et al. (US Pub. US 2002/0169804).

Regarding claim 13, Faist et al. disclose a method for accessing information of function blocks inserted into components of a fieldbus, compressing the step of: providing at least one of the function blocks with a web-server which makes available information of other function blocks in a general descriptive language (e.g., HTML) as pages which can be called up (see paragraphs 0005-008 and 0086-0087).

Regarding claim 14, Faist et al. disclose wherein: the pages which can be called up are displayed in a control unit which is connected via a network of process automation technology with the component of the fieldbus in which the web-server function block is stored (see paragraphs 0005-008 and 0086-0087).
